PROPELLING PEOPLE FORWARD

There's a moment on the water when everything just clicks. The stillness. The speed. The freedom. That moment is why Alera exists.

We didn't start Alera out of frustration. We started it because we saw the right time to do something different, something better. Alera Marine Group was founded with a clear opportunity: to build a boat and a brand with real presence, real performance, and real purpose.

From day one, intentionality has been the driving force. Every design, every weld, every decision has been made to improve the user experience—for owners, for dealers, and for everyone who gets behind the helm of an Alera.

Our debut model, the Model M, is a reflection of everything we believe in. From smart service access to intentional wiring paths, nothing is accidental. It's a boat designed to last, perform, and be enjoyed—not just admired in a showroom.

When you own an Alera, you're joining something built for boaters, by boaters. Not just a pontoon. A movement. A new standard.
